Objective of the Project

The goal of this project is to redesign and modernize the official website of Kingsukh Guest House, located in Baranti, Purulia. The objective was to build a visually stunning, responsive, and user-friendly website that reflects the aesthetic appeal and comfort of the guest house while allowing easy access to essential services, room details, gallery, and contact information.

Key Features

Multi-page Layout with Navigation

Home, About, Services, Rooms, Gallery, Contact

Responsive Design

Optimized for desktop, tablet, and mobile views

Modern UI/UX

Sleek animations, hover effects, and interactive transitions

Gallery Section

11 real photos with hover captions and animation

Google Map Integration

Embedded location for real-time navigation

Contact Section

WhatsApp, Email, Phone clickable + Social Media links

Hosting

Live deployment via GitHub and Netlify

Auto Deployment

Any GitHub push triggers auto-deploy to Netlify

● Technologies Used

Tool/Language	Purpose
<u>HTML5</u>	Structure of web pages
<u>CSS3</u>	Styling, layout, and animations
<u>JavaScript</u>	Interactivity (minimal use)
<u>Git & GitHub</u>	Version control and repo hosting
<u>Netlify</u>	Hosting and auto-deployment
<u>FontAwesome</u>	Social media & service icons
<u>Google Fonts</u>	Elegant fonts for readability
<u>Google Maps</u>	Location embedding

◆ Challenges Faced

Ensuring full responsiveness on iPad & mobile

Fixing dark mode image visibility (Firefox on iPad)

Customizing animations to remain lightweight and smooth

● Conclusion

This project helped me explore real-world website design with attention to detail, responsiveness, aesthetics, and user experience. From multi-page HTML structure to final deployment with version control, this internship task was a strong step toward becoming a full-stack web developer.

■ Future Scope

Convert to React for dynamic routing

Add backend (Node.js + Express) with contact form storage

Add admin dashboard for bookings & inquiries
